PROFESSIONAL SUMMARY

Software Engineer with 4+ years of professional experience building AI-powered applications, backend services, REST APIs and cloud integrations, and a Master's in Artificial Intelligence. Built and operate a production AI platform for a US client combining WhisperX speech-to-text, LLM analysis (Groq, llama-3.3-70b), asynchronous Python processing, PostgreSQL, AWS S3 and a Next.js / React frontend. Led an SAP ERP to Dynamics 365 integration on Azure as Solution Architect, and built MarketMind AI, a real-time order-flow platform with ML models (scikit-learn, PyTorch LSTM), backtesting and 212 automated tests.

TECHNICAL SKILLS

Languages: Python, C#, TypeScript, JavaScript, SQL, PHP

AI & Machine Learning: LLM integration (OpenAI ChatGPT API, Groq llama-3.3-70b), prompt engineering, Generative AI, scikit-learn, PyTorch, LSTM, gradient boosting, NLP, Deep Learning, WhisperX speech-to-text, GPU inference (Modal)

Data & Databases: pandas, NumPy, real-time data streaming, backtesting, out-of-sample evaluation, time-series analysis, data pipelines, data migration, PostgreSQL, SQL Server, MySQL, MongoDB, Redis, SQLite, Dataverse

Backend & APIs: FastAPI, Flask, ASP.NET Core, ASP.NET MVC, .NET Framework, Node.js, REST API design, WebSockets, event-driven architecture, background jobs (Inngest), OAuth2, pytest, automated testing

Frontend: React.js, Next.js, Vite, TradingView Lightweight Charts, HTML5, CSS3, Tailwind CSS, Bootstrap

Cloud & DevOps: Microsoft Azure (Logic Apps, Functions, Service Bus, Key Vault, Blob Storage, Azure SQL, Cosmos DB), AWS S3, Vercel, Modal, Supabase, Azure DevOps CI/CD, ARM Templates, Log Analytics, Git

Enterprise & Power Platform: Microsoft Dynamics 365, Dataverse, SAP ERP integration, Power Apps (Model-Driven & Canvas), Power Automate, Power BI

Currently Learning: Docker, Kubernetes, RAG and vector databases, AI agents (LangGraph, MCP), Go, Terraform

PROFESSIONAL EXPERIENCE

Freelance Software Engineer (AI & Full Stack) **Jan 2024 – Present**

Remote | Client: LUNARTECH (USA)

- Built and operate Dark Phoenix, a production AI video platform: Python AI pipeline, LLM integration, background jobs and a Next.js / React frontend.
- Own requirements, architecture, deployment and production support, working directly with the US client.

Software Engineer **Aug 2022 – Aug 2023**

Allied Consultants | Lahore, Pakistan

- Development Lead and Solution Architect for an event-driven SAP ERP to Dynamics 365 integration on Azure for a Swiss client.
- Built RESTful APIs with C# and ASP.NET Core integrating CRM, ERP and third-party systems; deployed via Azure DevOps CI/CD.
- Developed an AI Outlook add-in (ChatGPT API) and an HR onboarding system on Power Platform.

Frontend Developer **Dec 2021 – Jun 2022**

Centillion Solutions | Lahore, Pakistan

- Built responsive, reusable React.js components with state management and REST API integrations, using a component-based architecture in TypeScript, JavaScript, HTML5, CSS3 and Bootstrap for consistent cross-browser experiences.

PROJECTS

MarketMind AI – Real-Time Order-Flow Trading Platform **2026**

Personal Project | github.com/sallalhaider18/marketmind-ai

- Built a real-time BTC/ETH platform in Python, FastAPI and WebSockets that rebuilds the live order book and scores whether support/resistance levels will break or reverse.
- Backtested 130+ strategies and ML models (scikit-learn, PyTorch LSTM) out-of-sample; React dashboard with live charts and alerts; 212 pytest tests.

Dark Phoenix – AI Video Clipping Platform **Jan 2024 – Present**

Freelance Client: LUNARTECH (USA)

- Production AI pipeline that turns long videos into captioned 9:16 clips using WhisperX, a Groq LLM (llama-3.3-70b) and FFmpeg on Modal GPUs.
- Inngest job queue, Supabase (PostgreSQL), AWS S3, Google Drive API (OAuth2) and a Next.js dashboard on Vercel.

SAP – Dynamics 365 Integration System **Aug 2022 – Aug 2023**

Allied Consultants | Client: Blaser Swisslube (Switzerland)

- Led as Solution Architect an event-driven Azure ESB syncing SAP ERP and Dynamics 365 (Dataverse) using Logic Apps, Functions, Service Bus, Key Vault and Liquid maps.
- Large-scale SAP data migration, Azure DevOps CI/CD with ARM Templates, Model-Driven App customisation and client demos.

Auto Reply Outlook Add-in **Allied Consultants**

- C# Outlook add-in using the OpenAI ChatGPT API to generate context-aware professional email replies.

PetsOne.pk – E-Commerce Platform **Led development**

ASP.NET MVC, C#

- E-commerce web application with secure payment gateway integration and role-based access control.

HR Onboarding System **Allied Consultants**

- Power Platform system (Dataverse, Power Apps, Power Pipelines) for onboarding, salary and interview workflows.

EDUCATION

Master's in Artificial Intelligence **Oct 2023 – Jan 2025**

London South Bank University | London, UK

- Coursework: Machine Learning, Deep Learning, Neural Networks, Data Structures, Algorithms, Databases
- Final project: disease prediction system comparing 8 ML and deep learning models with 10-fold cross-validation (best: deep neural network, 91.4% average accuracy), with a Python desktop app.
